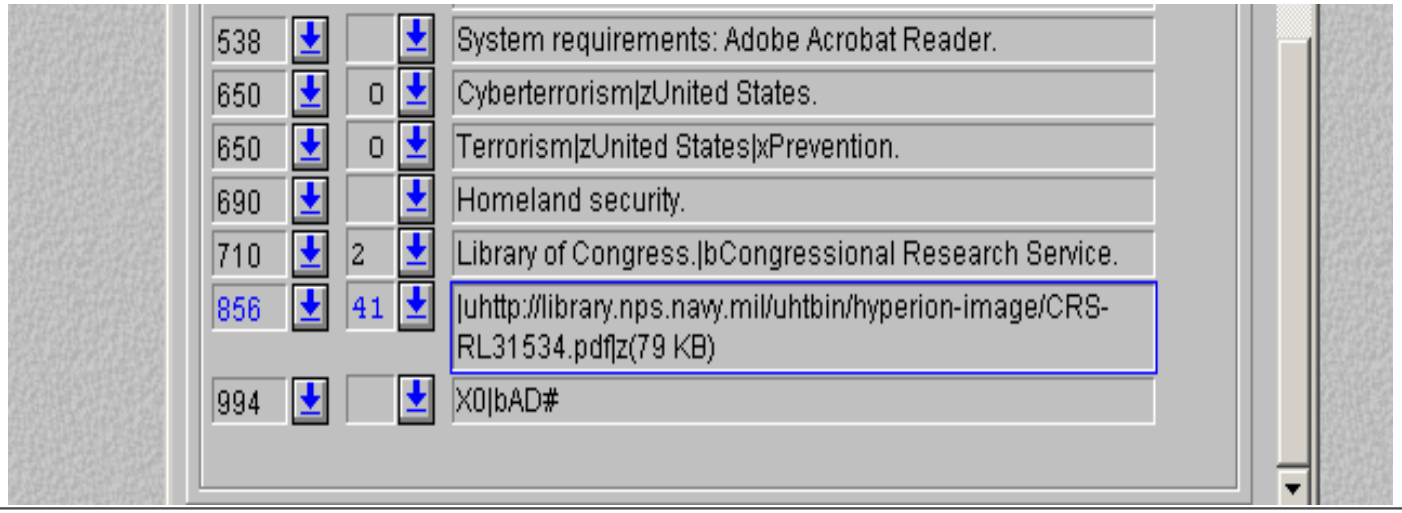
Use of Handles at the Naval Postgraduate School

Lillian W. Gassie
Head, Technical Services & Systems
Dudley Knox Library, NPS

Dudley Knox Library
Naval Postgraduate School

The Context

- Unclassified NPS theses were born-digital since Sept 2001
- Classified NPS theses to be submitted digitally by March 2003
- NPS technical reports produced digitally since 2002
- Library catalog has about 7,500 records with URLs, more added on a daily basis



538 System requirements: Adobe Acrobat Reader.
650 0 Cyberterrorism|zUnited States.
650 0 Terrorism|zUnited States|xPrevention.
690 Homeland security.
710 2 Library of Congress.|bCongressional Research Service.

The Problems

- Library domain name changed in April 2002 from web.nps.navy.mil/~library to library.nps.navy.mil
- Last month, we manually changed URLs of 245 reports from the Army War College
- Before 2002 librarians were unable send DTIC digital TRs as hyperlinks to patrons, only as attachments (huge PDF files were a problem)

How We Currently Use Handles

- For catalog records (with confidence that the URL will not change on us)
- In bibliographies sent to patrons via email

How We Could Use Handles

- Campus-wide, for standardized and controlled access to digital materials and reduced effort in URL maintenance
  - To be used for publications by various departments on different servers
  - For multimedia learning objects
  - For our digital library supporting a new curriculum on homeland security
